

Date	03 July 2026
Team ID	SWTID-2026-4593
Team Size	3
Team Leader	Hari Bellamkonda
Team Member 1	Kesha Vardhan Chinni
Team Member 2	Akili Venkata Siva Sai Srikar
Project Name	Machine Learning–Based Credit Card Approval Prediction System
Maximum Marks	4 Marks

Data Flow Diagram

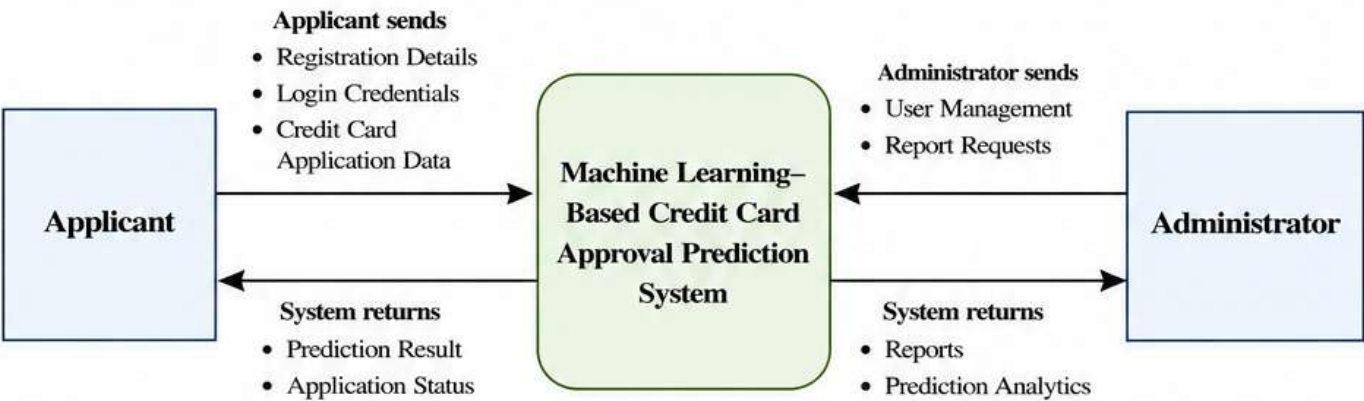

Introduction

The Data Flow Diagram (DFD) illustrates how information flows through the Machine Learning–Based Credit Card Approval Prediction System. It represents the movement of applicant data between external entities, system processes, machine learning components, and databases. The DFD provides a clear understanding of how information is collected, processed, stored, and presented.

DFD SYMBOL LEGEND

Symbol	Name	Description
	External Entity	Represents users or external systems interacting with the application.
	Process	Represents a system function that transforms input into output.
	Data Store	Stores application and prediction data.
	Data Flow	Represents movement of information between components.

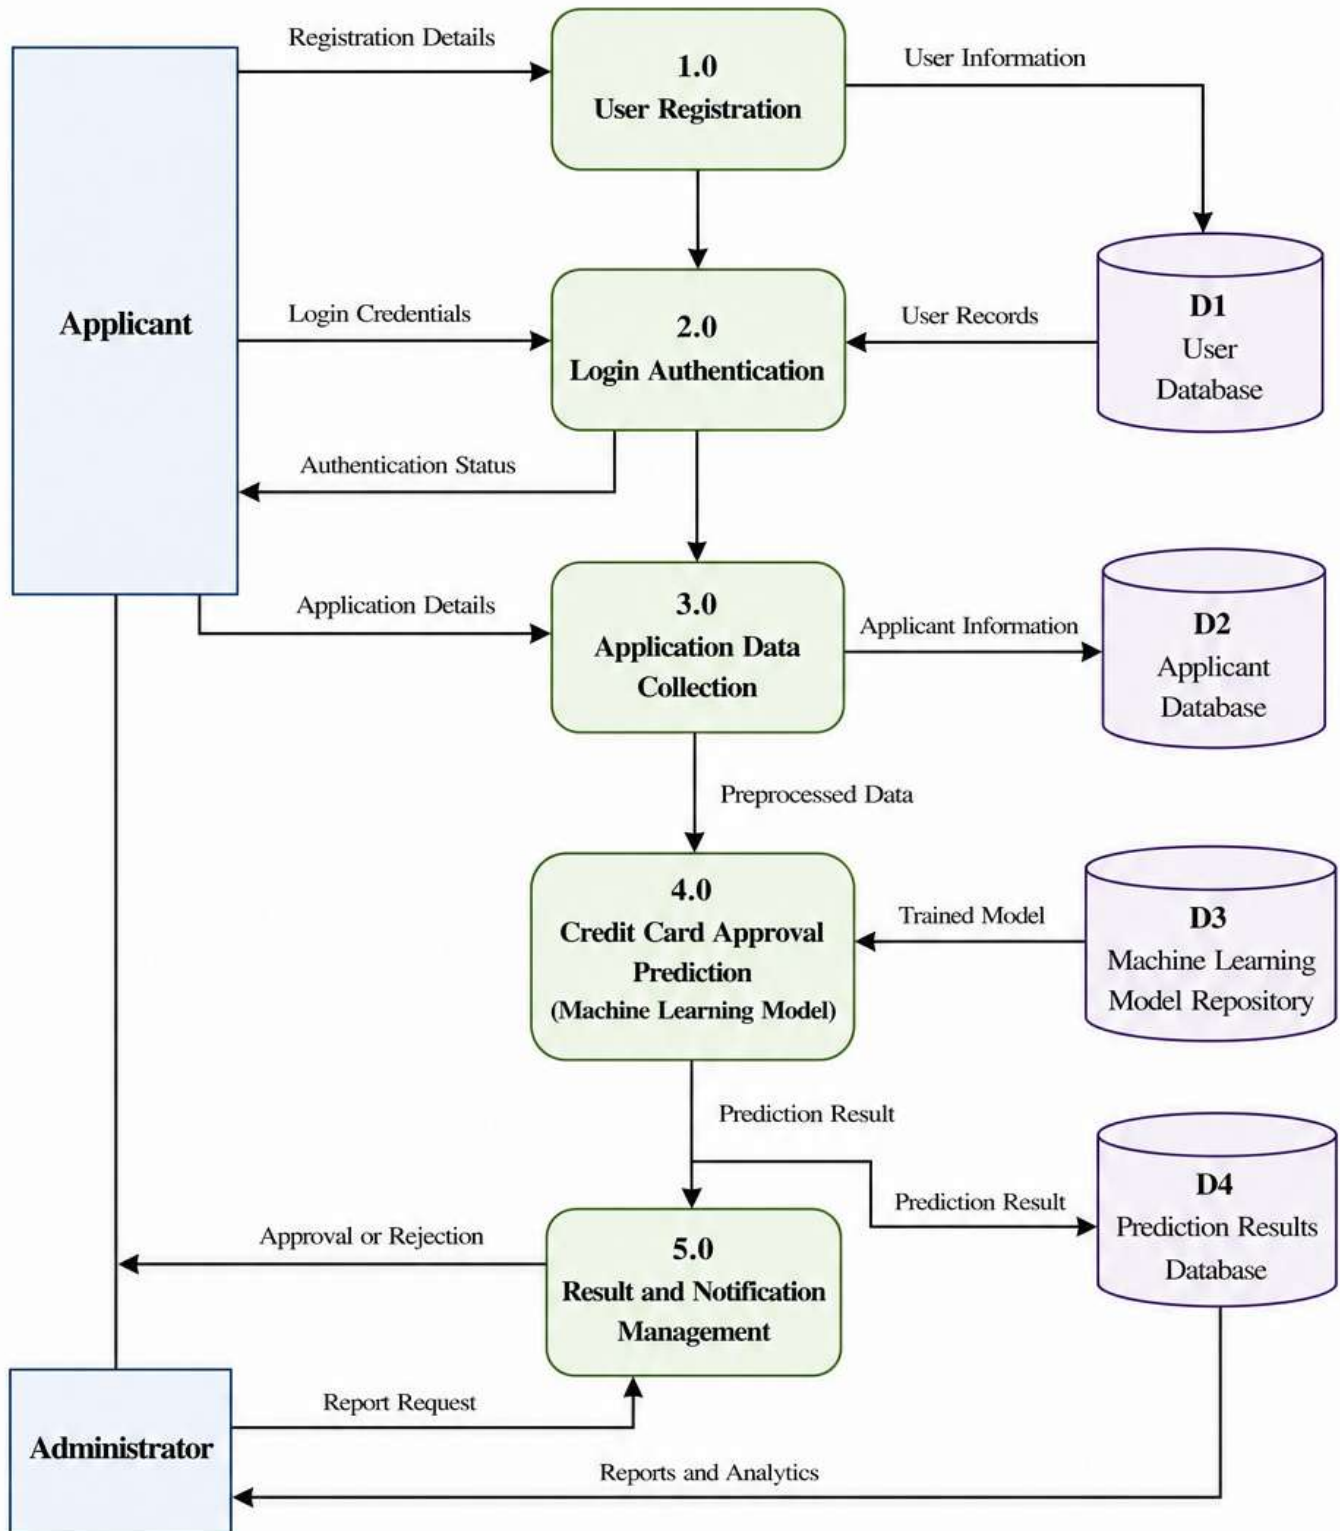

LEVEL-0 DATA FLOW DIAGRAM (CONTEXT DIAGRAM)

Note

The Context Diagram provides a high-level overview of system interactions without revealing internal processing details.

Level-1 Data Flow Diagram

Conclusion

The Level-1 Data Flow Diagram explains how applicant information flows through user registration, authentication, application processing, machine learning prediction, database storage, and result delivery. It provides a clear representation of the internal working of the Machine Learning–Based Credit Card Approval Prediction System.
