

No. of Functional Features Included in the Solution

Date	03 July 2026
Team ID	SWTID-2026-4593
Project Name	Machine Learning–Based Credit Card Approval Prediction System
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration	Allows new users to create an account with personal details and store in the database.	Authentication Module	Done	0.50
2	User Login	Allows registered users to securely login using email and password.	Authentication Module	Done	0.50
3	Applicant Details Input	Collects applicant information through a structured form for credit card approval prediction.	Frontend Module	Done	0.75
4	Data Preprocessing	Cleans, encodes and scales the input data before feeding it to the machine learning model.	Preprocessing Module	Done	0.75
5	Credit Card Approval Prediction	Predicts whether the applicant is likely to get the credit card approved or not.	ML Prediction Module	Done	1.00
6	Prediction Result Display	Displays the prediction result with probability score and applicant summary.	Frontend Module	Done	0.75
7	Application History	Stores and displays past applications and prediction results for the logged-in user.	Database Module	In Progress	0.50
8	Admin Dashboard	Allows admin to view all users, applications, and overall system statistics.	Admin Module	In Progress	0.25

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	6
Core / Must-Have Features	5

Additional / Nice-to-Have Features	2
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Login Page, Applicant Form, Result Display
2	Backend / Logic	3	Data Preprocessing, Prediction Logic, Business Rules
3	Database / Storage	2	User Data Storage, Application History
4	API / Integration	1	Model Integration for Prediction
5	Security / Authentication	2	User Registration, Secure Login
