

Demonstration of Proposed Features

Date	03 July 2026
Team ID	SWTID-2026-4593
Project Name	Machine Learning–Based Credit Card Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrate d (Yes / No)	Remarks
1	User Management	Secure user registration and login with authentication.	Implemented	Yes	Functional as per PEP 8 guidelines.
2	Applicant Form Workflow	Interactive submission form for collecting personal and financial data.	Implemented	Yes	Includes real-time input validation.
3	Data Preprocessing Module	Handles data cleaning, normalization, label encoding, and feature scaling.	Implemented	Yes	Using Pandas and Scikit-learn.
4	ML Prediction Engine	Processes applicant data through trained ML models for approval prediction.	Implemented	Yes	Generates status and confidence scores.
5	Database Integration	Secure storage and retrieval of application records and prediction history.	Implemented	Yes	Using MySQL database.
6	Admin Dashboard	Administrator monitoring of system performance, prediction logs, and statistics.	Implemented	Yes	Analytics and report generation.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
